

INSIDER THREATS

European Enterprises At Risk

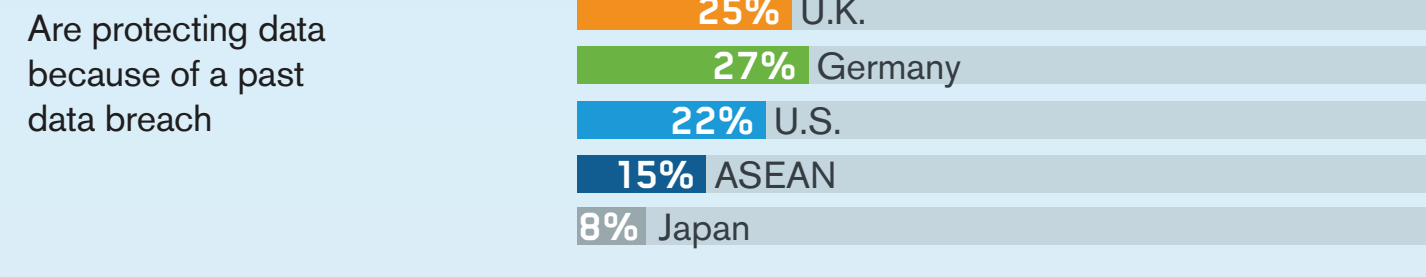

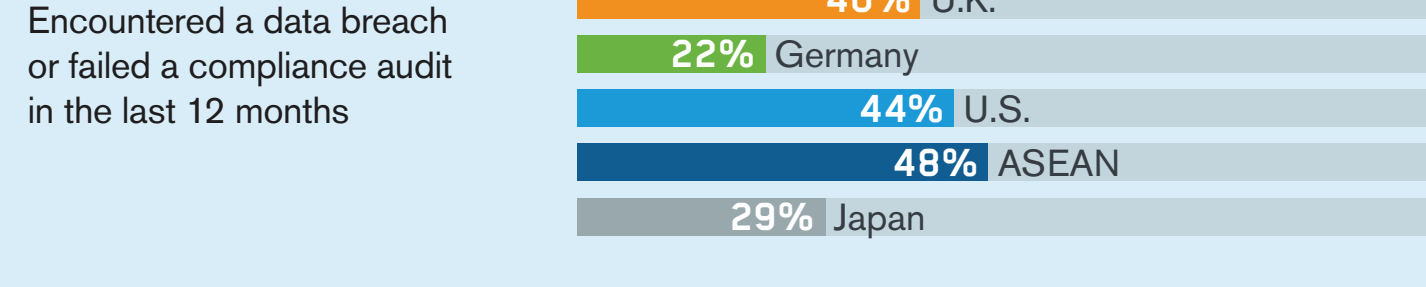

TRENDS AND FUTURE DIRECTIONS IN DATA SECURITY

The European edition of the 2015 Vormetric Insider Threat Report looks into the reasons why so many organizations are being breached, and provides business insight and opinion into the data breach threats that enterprise organizations face on a daily basis. The report is based on survey responses from 800 IT decision makers in major global markets – including 102 each in the U.K. and Germany.

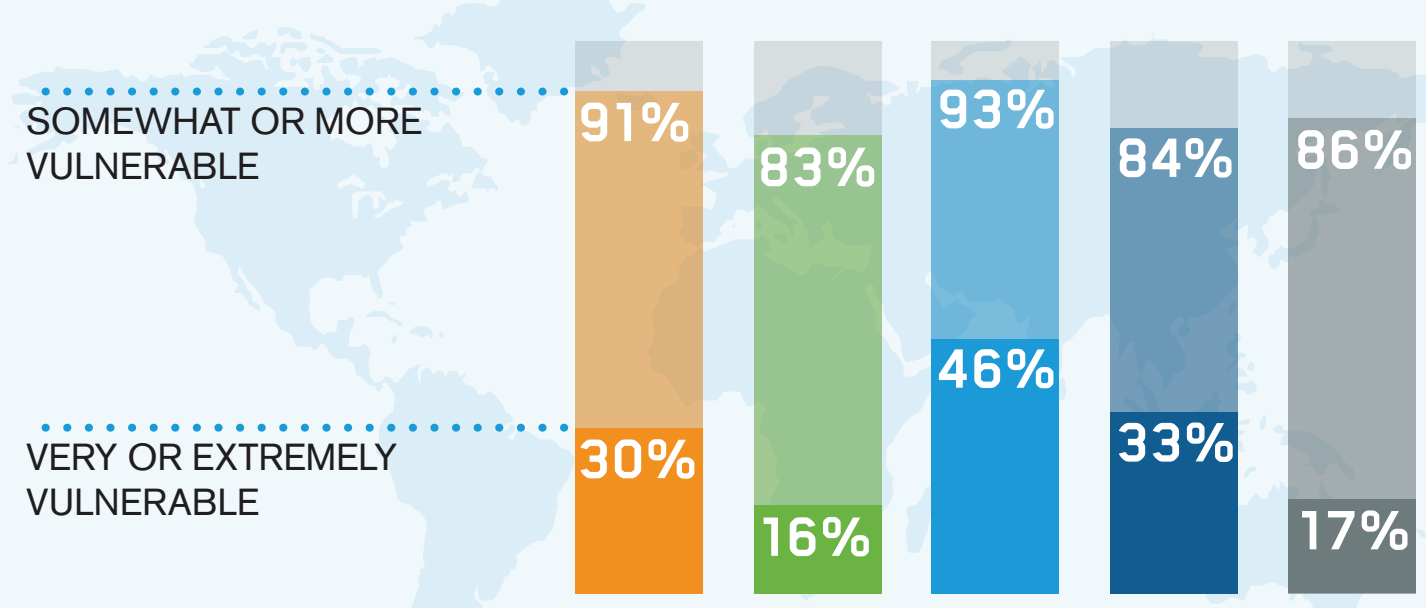

Insider threats are caused by a widening range of offenders. The individuals and groups involved have moved beyond everyday employees and IT staff. They now include malicious outsiders with the skills needed to access and then steal valid user credentials. It also has to include business partners, suppliers, contractors, and third-party service providers, because some of the most high profile data breaches in recent times have been initiated from within these groups. Unless properly managed all these individuals have the opportunity and in many cases the skills to reach inside corporate networks and steal business assets.

U.K. AND GERMAN ENTERPRISES – FAILING TO SECURE THEIR DATA

GERMANY AND THE U.K. HAD THE HIGHEST RATES MEASURED OF PREVIOUS DATA BREACHES ENCOUNTERED

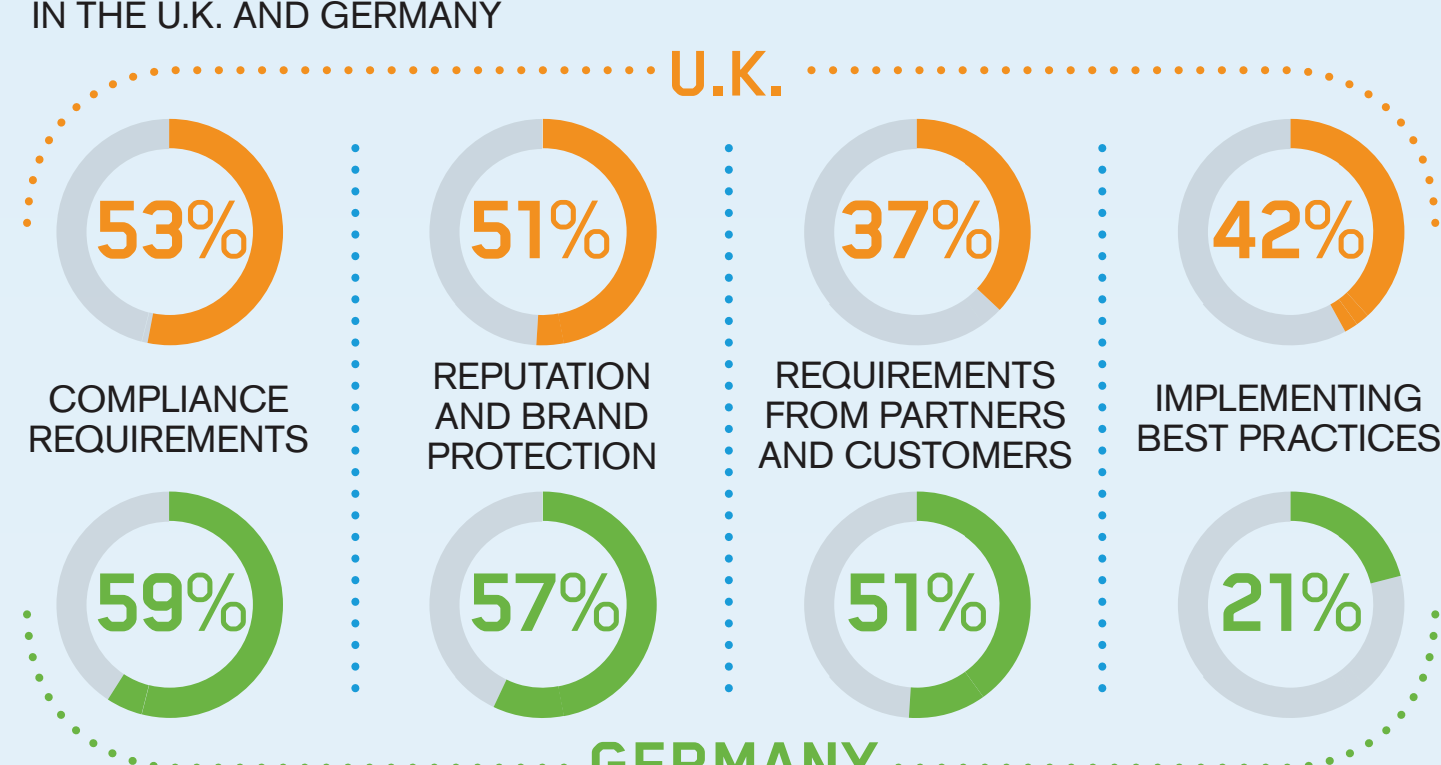

FEELING VULNERABLE TO INSIDER THREATS

GLOBALLY, ALL ORGANIZATIONS POLLED FELT VULNERABLE AT AN 80%+ RATE TO INSIDER THREATS – BUT ORGANIZATIONS IN GERMANY AND JAPAN WERE VERY OR EXTREMELY VULNERABLE AT RATES WELL BELOW THAT FOUND ELSEWHERE

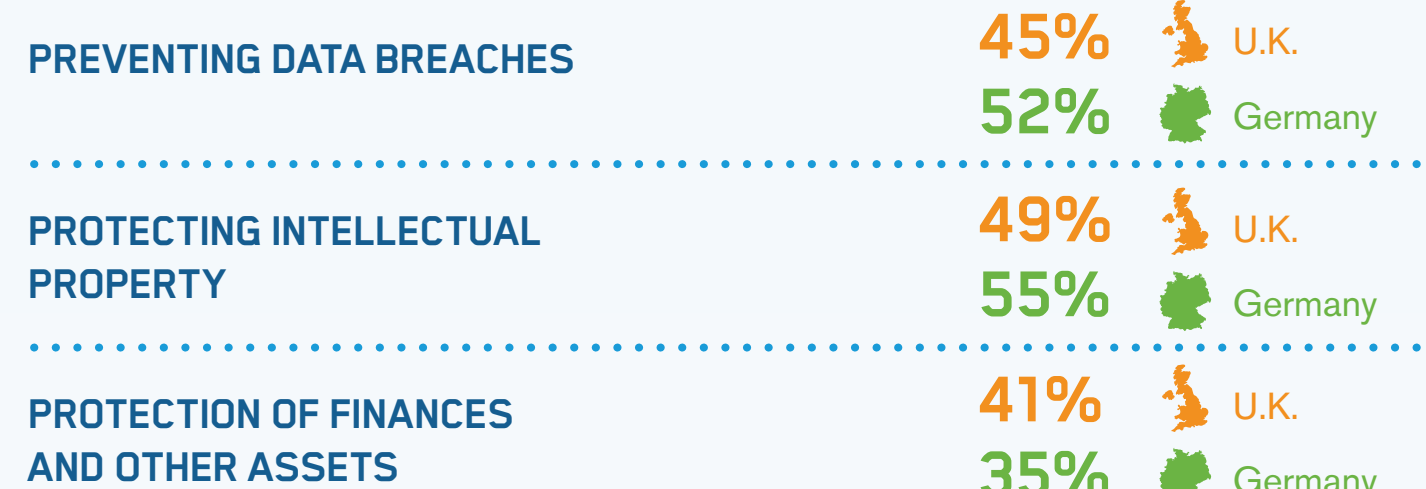

TOP REASONS FOR SECURING SENSITIVE DATA

COMPLIANCE – WHICH IS NO LONGER THE GOLD STANDARD FOR DATA SECURITY – IS STILL THE TOP REASON FOR SECURING SENSITIVE DATA IN THE U.K. AND GERMANY

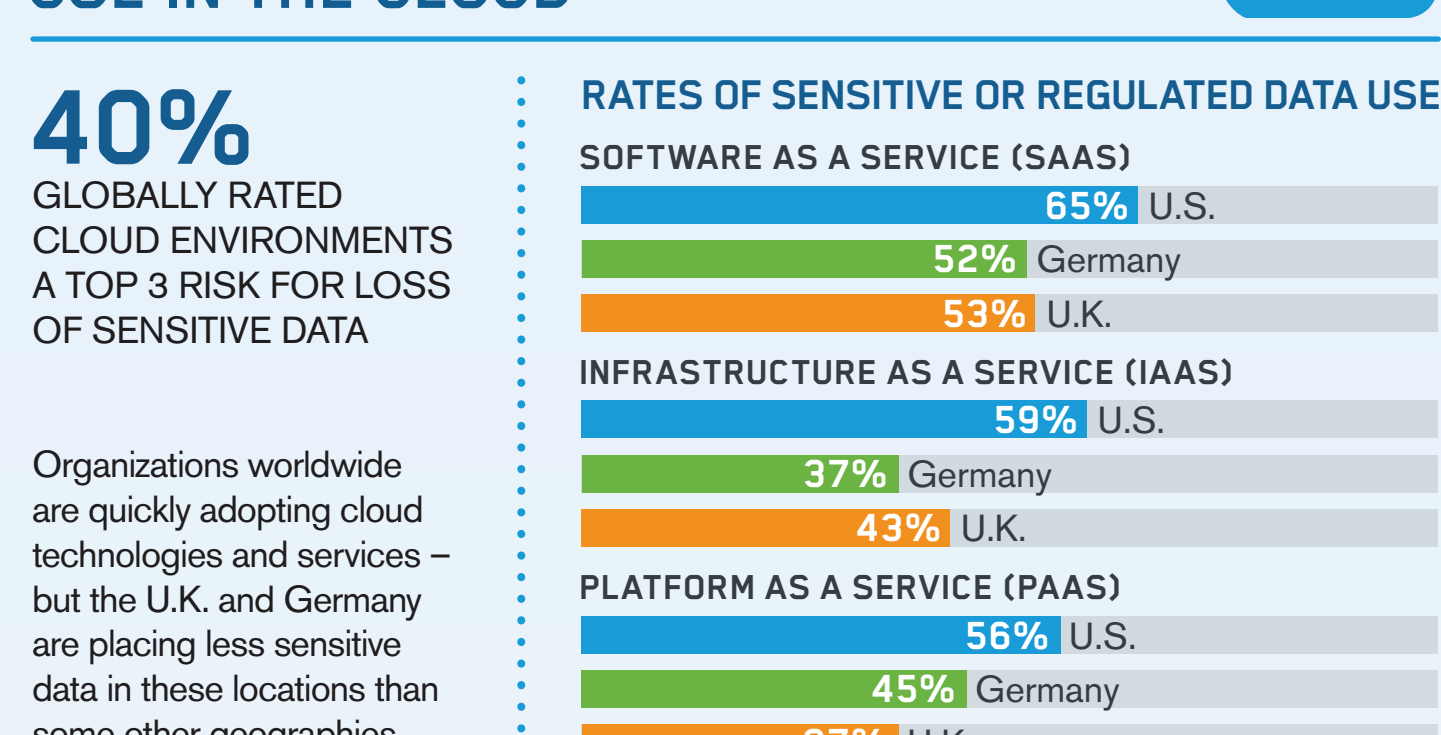

TOP IT SECURITY SPENDING PRIORITIES

But – when looking at it security spending priorities preventing data breaches and protecting intellectual property are now the top of the list

RATES OF SENSITIVE DATA USE IN THE CLOUD

THE MOST DANGEROUS INSIDERS ADMINISTER AND MANAGE INFRASTRUCTURE

RESPONDENTS IN THE U.K. AND GERMANY RECOGNIZE THE RISKS SEEN WORLDWIDE WITH NON-TRADITIONAL INSIDER ROLES

MANY ORGANIZATIONS ARE ADDRESSING THE THREAT

WHERE DO INSIDER THREATS COME FROM?
